Mentor Meeting Notes 9/15

Attendees: All participants
Note by: Hin Lui (Jonathan) Shum

App Functions:
- Login and upload their data
- Provide transactions and data science value
- End goal: deploy on any cloud platform and database

Sprint 1 target : login and a simple chart of transaction history

Where they are spending the money, what part. Where they are spending, clouds,
Scale, what the app can accommodate
Looking to scale this out
Uploading Excel sheet of payment history

Project description by Wednesday night, take a look on it on thursday and upload friday
12:30 Thursday next meeting

CICD? Apple pay google pay? Talk about later once we have the backend done
Concentrate backend
Github actions for CICD
Research on google pay
Paying through the app?

Financial tracking? Categories? Trends? Amount?
APIs available, look into it.
Decide which coding language to use? Which DB to use?
